

Preparatory information for guardians with children in preschool 20200318

Preparatory information for guardians with children in preschool 20200318

In view of the extraordinary situation that Sweden is in today, the child and education administration in Falköping municipality wants to inform about a possible future need for changed preschool activities.

Today, all teaching for upper secondary school students is transferred from secondary school to distance education and the Swedish government has announced that new decisions regarding compulsory school and pre_school may be relevant. Preparations are in progress to be able to provide continued preschool placement to the children whose guardians work in the socially beneficial functions decided by the government, if the government decisions are made to reduce the preschools scope of activities.

In an even more urgent situation, prioritization of pre_school places may become topical and preschool and home are then required to work together to maintain and safeguard our society.

Each preschool will provide information on how to set up the business and possibly change opening hours.

Keep yourself updated on the municipality's website where links to all relevant agencies can be found.
